

# 22in Recycler® Lawn Mower

Model No. 20370—Serial No. 314200001 and Up

Model No. 20371—Serial No. 314200001 and Up

Model No. 20377—Serial No. 314200001 and Up

Model No. 20378—Serial No. 314200001 and Up

## Operator's Manual

Replacement parts are available from an Authorized Service Dealer or at [www.shoptoro.com](http://www.shoptoro.com).

## Introduction

Read this information carefully to learn how to operate and maintain your product properly and to avoid injury and product damage. You are responsible for operating the product properly and safely.

You may contact Toro directly at [www.Toro.com](http://www.Toro.com) for product and accessory information, help finding a dealer, or to register your product.

Whenever you need service, genuine Toro parts, or additional information, contact an Authorized Service Dealer or Toro Customer Service and have the model and serial numbers of your product ready. [Figure 1](#) identifies the location of the model and serial numbers on the product.

**Figure 1**

1. Model and serial number plate

Write the product model and serial numbers in the space below:

<b>Model No.</b> _____
<b>Serial No.</b> _____

This manual identifies potential hazards and has safety messages identified by the safety alert symbol ([Figure 2](#)), which signals a hazard that may cause serious injury or death if you do not follow the recommended precautions.

**Figure 2**

1. Safety alert symbol

This manual uses 2 words to highlight information.

**Important** calls attention to special mechanical information and **Note** emphasizes general information worthy of special attention.

**WARNING**

**CALIFORNIA  
Proposition 65 Warning**

The engine exhaust from this product contains chemicals known to the State of California to cause cancer, birth defects, or other reproductive harm.

**Important:** This engine is not equipped with a spark arrester muffler. It is a violation of California Public Resource Code Section 4442 to use or operate the engine on any forest-covered, brush-covered, or grass-covered land. Other states or federal areas may have similar laws.

This spark ignition system complies with Canadian ICES-002.

The enclosed *Engine Owner's Manual* is supplied for information regarding the US Environmental Protection Agency (EPA) and the California Emission Control Regulation of emission systems, maintenance, and warranty. Replacements may be ordered through the engine manufacturer.

For models with stated engine horsepower, the gross horsepower of the engine was laboratory rated by the engine manufacturer in accordance with SAE J1940. As configured to meet safety, emission, and operating requirements, the actual engine horsepower on this class of lawn mower will be significantly lower.

## Safety

This lawn mower meets or exceeds the CPSC blade safety requirements for walk-behind rotary lawn mowers and the B71.1 specifications of the American National Standards Institute in effect at the time of production.

**Read and understand the contents of this manual before you start the engine.**

The safety alert symbol (Figure 2) is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death. Improperly using or maintaining this mower could result in injury or death. To reduce this potential, comply with the following safety instructions.

The following instructions have been adapted from the ANSI/OPEI standard B71.1-2012.

**This cutting machine can amputate hands and feet and throw objects. Failure to observe the following safety instructions could result in serious injury or death.**

## General Operation

- Read, understand, and follow all instructions on the machine and in the manual(s) before starting.
- Do not put hands or feet near or under the machine. Keep clear of the discharge opening at all times.
- Only allow responsible adults, who are familiar with the instructions, to operate this machine.
- Clear the area of objects such as rocks, wire, toys, etc., which could be thrown by the blade. Stay behind the handle when the engine is running.
- Be sure the area is clear of bystanders before operating. Stop machine if anyone enters the area.
- Wear appropriate clothing, including slip resistant, substantial footwear and eye protection. Tie back long hair and don't wear jewelry.
- Do not pull machine backward unless absolutely necessary. Always look down and behind before and while moving backward.
- Never direct discharged material toward anyone. Avoid discharging material against a wall or obstruction. Material may ricochet back toward the operator. Stop the blade when crossing gravel surfaces.
- Do not operate machine without the entire grass catcher, discharge guard, rear guard, or other safety protective devices in place and working.
- Never leave a running machine unattended.
- Stop the engine and wait until the blade comes to a complete stop before cleaning the machine, removing grass catcher, or unclogging the discharge guard.
- Operate machine only in daylight or good artificial light.
- Do not operate machine while ill, tired, or under the influence of alcohol or drugs.
- Never operate mower in wet grass. Always be sure of your footing; walk; never run.
- Disengage the drive system, if so equipped, before starting the engine.
- If the machine should start to vibrate abnormally, stop the engine and check for the cause immediately. Vibration is generally a warning of trouble.
- See manufacturer's instructions for proper operation and installation of accessories. Only use accessories approved by the manufacturer.

## Slope Operation

Slopes are a major factor related to slip and fall accidents, which can result in severe injury. Operation on all slopes require extra caution. If you feel uneasy on a slope, do not mow it.

- Mow across the face of slopes; never up and down. Exercise extreme caution when changing direction on slopes.
- Watch for holes, ruts, bumps, rocks, or other hidden objects. Uneven terrain could cause a slip and fall accident. Tall grass can hide obstacles.
- Do not mow on wet grass or excessively steep slopes. Poor footing could cause a slip and fall accident.
- Do not mow near drop-offs, ditches, or embankments. You could lose your footing or balance.

## Children

Tragic accidents can occur if the operator is not alert to the presence of children. Children are often attracted to the machine and the mowing activity. **Never** assume that children will remain where you last saw them.

- Keep children out of the mowing area and under the watchful care of a responsible adult other than the operator.
- Be alert and turn mower off if a child enters the area.
- Never allow children to operate the machine.
- Use extra care when approaching blind corners, shrubs, trees, or other objects that may block your view of a child.

## Service

### Safe Handling of Gasoline

**To avoid personal injury or property damage, use extreme care in handling gasoline. Gasoline is extremely flammable and the vapors are explosive.**

- Extinguish all cigarettes, cigars, pipes, and other sources of ignition.
- Use only an approved gasoline container.
- Never remove gas cap or add fuel with the engine running. Allow engine to cool before refueling.
- Never refuel the machine indoors.
- Never store the machine or fuel container where there is an open flame, spark, or pilot light such as on a water heater or on other appliances.
- Never fill containers inside a vehicle or on a truck or trailer bed with a plastic liner. Always place containers on the ground away from your vehicle before filling.
- Remove gas-powered equipment from the truck or trailer and refuel it on the ground. If this is not possible, then refuel such equipment with a portable container, rather than from a gasoline dispenser nozzle.
- Keep the nozzle in contact with the rim of the fuel tank or container opening at all times until fueling is complete. Do not use a nozzle lock-open device.

- If fuel is spilled on clothing, change clothing immediately.
- Never overfill fuel tank. Replace gas cap and tighten securely.

### **⚠ WARNING**

**Exhaust contains carbon monoxide, an odorless, deadly poison that can kill you.**

**Do not run the engine indoors or in an enclosed area.**

### General Service

- Never operate machine in a closed area.
- Keep all nuts and bolts tight to be sure the equipment is in safe working condition.
- Never tamper with safety devices. Check their proper operation regularly.
- Keep machine free of grass, leaves, or other debris build-up. Clean up oil or fuel spillage and remove any fuel-soaked debris. Allow machine to cool before storing.
- If you strike a foreign object, stop and inspect the machine. Repair, if necessary, before starting.
- Never make any adjustments or repairs with the engine running. Disconnect the spark plug wire and ground against engine to prevent unintended starting.
- Check grass catcher components and the discharge guard frequently and replace with manufacturer's recommended parts, when necessary.
- Mower blades are sharp. Wrap the blade or wear gloves, and use extra caution when servicing them.
- Do not change the engine governor setting or overspeed the engine.
- Maintain or replace safety and instruction labels, as necessary.
- To best protect your investment and maintain optimal performance of your Toro equipment, count on Toro genuine parts. When it comes to reliability, Toro delivers replacement parts designed to the exact engineering specifications of our equipment. For peace of mind, insist on Toro genuine parts.

# Safety and Instructional Decals

**Important:** Safety and instruction decals are located near areas of potential danger. Replace damaged decals.

**Manufacturer's Mark**

1. Indicates the blade is identified as a part from the original machine manufacturer.

**94-8072**

**112-8867**

1. Lock
2. Unlock

**114-7982**

1. Warning—read the *Operator's Manual*.
2. Thrown object hazard—keep bystanders a safe distance from the machine.
3. Cutting/dismemberment hazard of hand or foot, mower blade—remove the ignition key and read the instructions before servicing or performing maintenance.
4. Cutting/dismemberment hazard of hand or foot, mower blade—stay away from moving parts.
5. Cutting/dismemberment hazard of hand or foot, mower blade—do not operate up and down slopes; operate side to side on slopes; stop the engine before leaving the operating position; and look behind you when backing up.

# Setup

**Important:** Remove and discard the protective plastic sheet that covers the engine.

## 1

### Installing the Handle

No Parts Required

#### Procedure

#### **⚠ WARNING**

Folding or unfolding the handle improperly can damage the cables, causing an unsafe operating condition.

- Do not damage the cables when folding or unfolding the handle.
- If a cable is damaged, contact an Authorized Service Dealer.

1. Remove the handle knobs from the machine housing (Figure 3).

**Important:** Route the cables to the outside of the handle knobs as you install the handle.

Figure 3

2. Move the handle to the operating position.
3. Install and tighten the handle knobs that you removed in step 1 (Figure 3).

## 2

### Installing the Recoil-starter Rope in the Rope Guide

No Parts Required

#### Procedure

**Important:** To start the engine safely and easily whenever you use the machine, install the recoil-starter rope in the rope guide.

Hold the blade-control bar to the upper handle and pull the recoil-starter rope through the rope guide on the handle (Figure 4).

Figure 4

1. Recoil-starter rope
2. Rope guide

# 3

## Filling the Engine with Oil

No Parts Required

### Procedure

Your machine does not come with oil in the engine.

1. Remove the dipstick (Figure 5).

Figure 5

## Product Overview

Figure 6

- |                             |                          |
|-----------------------------|--------------------------|
| 1. Cutting-height lever (4) | 7. Recoil-start handle   |
| 2. Spark plug               | 8. Blade-control bar     |
| 3. Air filter (not shown)   | 9. Self-propel-drive bar |
| 4. Oil fill/dipstick        | 10. Handle knob (2)      |
| 5. Fuel-tank cap            | 11. Washout port         |
| 6. Handle                   |                          |

2. **Slowly** pour oil into the oil-fill tube until the oil level reaches the Full line on the dipstick (Figure 5). **Do not overfill.** (Max. fill: 0.65 L (22 oz), type: 10W-30 or SAE 30 detergent oil with an API service classification of SJ or higher.)

**Note:** Each time you check the oil level, remove the dipstick and wipe it clean, insert it into the oil filler neck (but **do not** screw it in), then remove it again and check the level (Figure 5).

**Note:** If you overfill the engine, pour some oil out of it; refer to [Changing the Engine Oil](#) (page 12).

3. Install the dipstick securely.

**Important:** *Change the engine oil after the first 5 operating hours; change it yearly thereafter. Refer to [Changing the Engine Oil](#) (page 12).*

Figure 7

- |              |                         |
|--------------|-------------------------|
| 1. Grass bag | 2. Side-discharge chute |
|--------------|-------------------------|

# Operation

## Filling the Fuel Tank

### **▲ DANGER**

Gasoline is extremely flammable and explosive. A fire or explosion from gasoline can burn you and others.

- To prevent a static charge from igniting the gasoline, place the container and/or machine directly on the ground before filling, not in a vehicle or on an object.
- Fill the tank outdoors when the engine is cold. Wipe up spills.
- Do not handle gasoline when smoking or around an open flame or sparks.
- Store gasoline in an approved fuel container, out of the reach of children.
- For best results, use only clean, fresh (less than 30 days old), unleaded gasoline with an octane rating of 87 or higher ((R+M)/2 rating method).
- Oxygenated fuel with up to 10% ethanol or 15% MTBE by volume is acceptable.
- **Ethanol:** Gasoline with up to 10% ethanol (gasohol) or 15% MTBE (methyl tertiary butyl ether) by volume is acceptable. Ethanol and MTBE are not the same. Gasoline with 15% ethanol (E15) by volume is not approved for use. Never use gasoline that contains more than 10% ethanol by volume, such as E15 (contains 15% ethanol), E20 (contains 20% ethanol), or E85 (contains up to 85% ethanol). Using unapproved gasoline may cause performance problems and/or engine damage which may not be covered under warranty.
- **Do not** use gasoline containing methanol.
- **Do not** store fuel either in the fuel tank or in fuel containers over the winter unless a fuel stabilizer is used.
- **Do not** add oil to gasoline.

Fill the fuel tank with fresh unleaded regular gasoline from a major name-brand service station (Figure 8).

**Important:** To reduce starting problems, add fuel stabilizer to the fuel all season, mixing it with gasoline less than 30 days old.

Figure 8

## Checking the Engine-Oil Level

**Service Interval:** Before each use or daily

1. Remove the dipstick, wipe it clean, and insert it into the oil-filler neck, but **do not** screw it in (Figure 9).

Figure 9

2. Remove the dipstick and check the oil level (Figure 9). If the oil level is below the Add mark on the dipstick, **slowly** pour oil into the oil-fill tube to raise the oil level to the Full mark on the dipstick. **Do not overfill.** (Max. fill: 0.65 L (22 oz), type: 10W-30 or SAE 30 detergent oil with an API service classification of SJ or higher.)  
**Note:** If you overfill the engine, pour some oil out of it as directed in [Changing the Engine Oil](#) (page 12).
3. Install the dipstick securely.

# Adjusting the Cutting Height

## ⚠ WARNING

Adjusting the cutting height may bring you into contact with the moving blade, causing serious injury.

- Stop the engine and wait for all moving parts to stop.
- Do not put your fingers under the housing when adjusting the cutting height.

## ⚠ CAUTION

If the engine has been running, the muffler will be hot and can severely burn you. Keep away from the hot muffler.

Adjust the cutting height as desired. Set the front wheels to the same height as the rear wheels.

**Note:** To raise the machine, move all the cutting-height levers rearward. To lower the machine, move all the cutting-height levers forward (Figure 10).

Figure 10

1. Raise the machine
2. Lower the machine

**Note:** The cutting-height settings are 25 mm (1 inch); 35 mm (1-3/8 inches); 44 mm (1-3/4 inches); 54 mm (2-1/8 inches); 64 mm (2-1/2 inches); 73 mm (2-7/8 inches); 83 mm (3-1/4 inches); 92 mm (3-5/8 inches); and 102 mm (4 inches).

# Starting the Engine

1. Hold the blade-control bar against the handle (Figure 11).

Figure 11

1. Blade-control bar
2. Recoil-start handle

2. Pull the recoil-start handle lightly until you feel resistance, then pull it sharply. Allow the rope to return to the handle slowly (Figure 11).

**Note:** If the machine does not start after several attempts, contact an Authorized Service Dealer.

# Using the Self-propel Drive

To operate the self-propel drive, squeeze the self-propel-drive bar (Figure 12) toward the handle and hold it.

Figure 12

1. Self-propel-drive bar

To disengage the self-propel drive, release the self-propel-drive bar.

**Note:** The maximum self-propel ground speed is fixed. To reduce the ground speed, increase the space between the self-propel-drive bar and the handle.

## Stopping the Engine

To stop the engine, release the blade-control bar.

**Important:** When you release the blade-control bar, both the engine and blade should stop within 3 seconds. If they do not stop properly, stop using your machine immediately and contact an Authorized Service Dealer.

## Recycling the Clippings

Your machine comes from the factory ready to recycle the grass and leaf clippings back into the lawn.

If the grass bag is on the machine, remove it; refer to [Removing the Grass Bag \(page 9\)](#) before recycling the clippings. If the side-discharge chute is on the machine, remove it; refer to [Removing the Side-Discharge Chute \(page 10\)](#) before recycling the clippings.

## Bagging the Clippings

Use the grass bag when you want to collect grass and leaf clippings from the lawn.

**Note:** Ensure the bag is seated in the correct position.

### ⚠ WARNING

A worn grass bag could allow small stones and other similar debris to be thrown in the operator's or bystander's direction and result in serious personal injury or death to the operator or bystanders.

Check the grass bag frequently. If it is damaged, install a new Toro replacement bag.

If the side discharge chute is on the machine, remove it; refer to [Removing the Side-Discharge Chute \(page 10\)](#) before bagging the clippings.

### ⚠ WARNING

The blade is sharp; contacting the blade can result in serious personal injury.

Stop the engine and wait for all moving parts to stop before leaving the operating position.

## Installing the Grass Bag

**Note:** Ensure the bag is seated in the correct position.

1. Raise and hold up the rear deflector ([Figure 13](#)).

**Figure 13**

1. Notches
  2. Rear deflector
  3. Grass bag pin (2)
- 
2. Install the grass bag, ensuring that the pins on the bag rest in the notches on the handle ([Figure 13](#)).
  3. Lower the rear deflector.

## Removing the Grass Bag

To remove the bag, reverse the steps above.

## Side-discharging the Clippings

Use the side discharge for cutting very tall grass.

If the bag is on the machine, remove it before side-discharging the clippings.

### **⚠ WARNING**

The blade is sharp; contacting the blade can result in serious personal injury.

Stop the engine and wait for all moving parts to stop before leaving the operating position.

## Installing the Side-Discharge Chute

Lift up the side deflector and install the side-discharge chute (Figure 14).

Figure 14

## Removing the Side-Discharge Chute

To remove the side-discharge chute, lift up the side deflector, remove the side-discharge chute, and lower the side-discharge deflector.

## Operating Tips

### General Mowing Tips

- Clear the area of sticks, stones, wire, branches, and other debris that the blade could hit.
- Avoid striking solid objects with the blade. Never deliberately mow over any object.
- If the machine strikes an object or starts to vibrate, immediately stop the engine, disconnect the wire from the spark plug, and examine the machine for damage.
- For best performance, install a new blade before the cutting season begins.
- Replace the blade when necessary with a Toro replacement blade.

### Cutting Grass

- Cut only about a third of the grass blade at a time. Do not cut below the 54 mm (2-1/8 inch) setting unless the grass is sparse or it is late fall when grass growth begins to slow down. Refer to [Adjusting the Cutting Height \(page 8\)](#).
- When cutting grass over 15 cm (6 inches) tall, mow at the highest cutting height setting and walk slower; then mow again at a lower setting for the best lawn appearance. If the grass is too long, the machine may plug and cause the engine to stall.
- Mow only dry grass or leaves. Wet grass and leaves tend to clump on the yard and can cause the machine to plug or the engine to stall.

### **⚠ WARNING**

Wet grass or leaves can cause serious injury if you slip and contact the blade. Mow only in dry conditions.

- Be aware of a potential fire hazard in very dry conditions, follow all local fire warnings, and keep the machine free of dry grass and leaf debris.
- Alternate the mowing direction. This helps disperse the clippings over the lawn for even fertilization.
- If the finished lawn appearance is unsatisfactory, try one or more of the following:
  - Replace the blade or have it sharpened.
  - Walk at a slower pace while mowing.
  - Raise the cutting height on your machine.
  - Cut the grass more frequently.
  - Overlap cutting swaths instead of cutting a full swath with each pass.

- Set the cutting height on the front wheels one notch lower than the rear wheels. For example, set the front wheels at 54 mm (2-1/8-inch) and the rear wheels at 64 mm (2-1/2 inches).
- If there are more than 13 cm (5 inches) of leaves on the lawn, set the front cutting height 1 or 2 notches higher than the rear cutting height.
- Slow down your mowing speed if the machine does not cut the leaves finely enough.

## Cutting Leaves

- After cutting the lawn, ensure that half of the lawn shows through the cut leaf cover. You may need to make more than one pass over the leaves.

# Maintenance

**Note:** Determine the left and right sides of the machine from the normal operating position.

## Recommended Maintenance Schedule(s)

Maintenance Service Interval	Maintenance Procedure
After the first 5 hours	<ul style="list-style-type: none"> <li>• Change the engine oil.</li> </ul>
Before each use or daily	<ul style="list-style-type: none"> <li>• Check the engine-oil level.</li> <li>• Ensure that the engine stops within 3 seconds after releasing the blade-control bar.</li> <li>• Clean grass clippings and dirt from under the machine.</li> </ul>
Every 25 hours	<ul style="list-style-type: none"> <li>• Check the air cleaner for dirty, loose, or damaged parts, and clean or replace them if necessary.</li> </ul>
Every 50 hours	<ul style="list-style-type: none"> <li>• Change the engine oil.</li> </ul>
Every 100 hours	<ul style="list-style-type: none"> <li>• Replace the air cleaner element (more frequently when operating the machine in dusty or dirty operating conditions).</li> </ul>
Before storage	<ul style="list-style-type: none"> <li>• Empty the fuel tank before repairs as directed and before annual storage.</li> </ul>
Yearly	<ul style="list-style-type: none"> <li>• Replace the blade or have it sharpened; replace or sharpen it more frequently if the edge dulls quickly.</li> <li>• Clean the air cooling system; clean it more frequently in dusty operating conditions. Refer to your engine owner's manual.</li> <li>• Refer to your engine operator's manual for any additional yearly maintenance procedures.</li> </ul>

**Important:** Refer to your engine owner's manual for additional maintenance procedures.

**Note:** Replacement parts are available from an Authorized Service Dealer (go to [www.toro.com](http://www.toro.com) to find the nearest dealer) or at [www.shoptoro.com](http://www.shoptoro.com).

## Preparing for Maintenance

1. Stop the engine and wait for all moving parts to stop.
2. Disconnect the spark-plug wire from the spark plug (Figure 15) before performing any maintenance procedure.

**Figure 15**

1. Spark-plug wire

- After performing the maintenance procedure(s), connect the spark-plug wire to the spark plug.

**Important:** Before tipping the machine to change the oil or replace the blade, allow the fuel tank to run dry through normal usage. If you must tip the machine prior to running out of fuel, use a hand fuel pump to remove the fuel. Always tip the machine onto its side with the dipstick down.

### ⚠ WARNING

Tipping the machine may cause the fuel to leak. Gasoline is flammable, explosive and can cause personal injury.

Run the engine dry or remove the gasoline with a hand pump; never siphon.

## Servicing the Air Cleaner

**Service Interval:** Every 25 hours/Yearly (whichever comes first)—Check the air cleaner for dirty, loose, or damaged parts, and clean or replace them if necessary.

Every 100 hours/Yearly (whichever comes first)—Replace the air cleaner element (more frequently when operating the machine in dusty or dirty operating conditions).

- Perform the pre-maintenance procedures; refer to [Preparing for Maintenance \(page 11\)](#).
- Press the button on the air-cleaner cover ([Figure 16](#)) and open the cover.

Figure 16

- |                             |                        |
|-----------------------------|------------------------|
| 1. Air-cleaner cover        | 3. Air-cleaner housing |
| 2. Air-cleaner foam element | 4. Button              |

- Replace the air-cleaner element.
- Install the air-cleaner cover.

## Changing the Engine Oil

**Service Interval:** After the first 5 hours

Every 50 hours/Yearly (whichever comes first)

Run the engine a few minutes before changing the oil to warm it. Warm oil flows better and carries more contaminants.

- Perform the pre-maintenance procedures; refer to [Preparing for Maintenance \(page 11\)](#).
- Tip the machine onto its side, with the air filter up, then remove the dipstick to drain the used oil out through the oil-fill tube ([Figure 17](#)).

Figure 17

- After draining the used oil, return the machine to the normal operating position.
- Slowly** pour oil into the oil-fill tube until the oil level reaches the Full line on the dipstick ([Figure 18](#)). **Do not overfill.** (Max. fill: 0.65 L (22 oz), type: 10W-30 or SAE 30 detergent oil with an API service classification of SJ or higher.)

Figure 18

**Note:** Each time you check the oil level, remove the dipstick and wipe it clean, insert it into the oil-filler neck (but **do not** screw it in), then remove it again and check the level of the dipstick.

**Note:** If you overfill the engine, drain some of the oil out of the engine crankcase.

- Install the dipstick securely.
- Dispose of the used oil properly at a local recycling center.

# Replacing the Blade

Service Interval: Yearly

**Important:** You will need a torque wrench to install the blade properly. If you do not have a torque wrench or are uncomfortable performing this procedure, contact an Authorized Service Dealer.

Examine the blade whenever you run out of gasoline. If the blade is damaged or cracked, replace it immediately. If the blade edge is dull or nicked, have it sharpened and balanced, or replace it.

## ⚠ WARNING

The blade is sharp; contacting the blade can result in serious personal injury.

Wear gloves when servicing the blade.

1. Refer to [Preparing for Maintenance](#) (page 11).
2. Tip the machine onto its side with the air filter up.
3. Use a block of wood to hold the blade steady ([Figure 19](#)).

Figure 19

4. Remove the blade, saving all mounting hardware ([Figure 19](#)).
5. Install the new blade and all mounting hardware ([Figure 20](#)).

Figure 20

**Important:** Position the curved ends of the blade to point toward the machine housing.

6. Use a torque wrench to tighten the blade bolt to 82 N-m (60 ft-lb).

**Important:** A bolt torqued to 82 N-m (60 ft-lb) is very tight. While holding the blade with a block of wood, put your weight behind the ratchet or wrench and tighten the bolt securely. This bolt is very difficult to overtighten.

## Adjusting the Self-propel-Drive Cable

Whenever you install a new self-propel cable or if the self-propel drive is out of adjustment, adjust the self-propel-drive cable.

1. Loosen the cable support nut ([Figure 21](#)).

**Figure 21**

This figure is simplified for the purpose of clarity.

2. Pull down the cable jacket (toward the machine) until there is no slack in the cable (Figure 22).

**Figure 22**

This figure is simplified for the purpose of clarity.

3. Tighten the nut on the cable support.

## Cleaning under the Machine

**Service Interval:** Before each use or daily

### **⚠ WARNING**

The machine may dislodge material from under the machine housing.

- Wear eye protection.
- Stay in the operating position (behind the handle) when the engine is running.
- Do not allow bystanders in the area.

For best results, clean the machine soon after you have completed mowing.

1. Lower the machine to its lowest cutting height setting. Refer to [Adjusting the Cutting Height \(page 8\)](#).
2. Move the machine onto a flat paved surface.

3. Wash out the area under the rear deflector where the clippings go from the housing to the grass bag.

**Note:** Wash out the area with the bag-on-demand in both the fully forward and fully rearward positions.

4. Attach a garden hose that is connected to a water supply to the washout port on the machine housing (Figure 23).

**Figure 23**

1. Washout port

5. Turn the water on.
6. Start the engine and run it until there are no more clippings that come out from under the machine housing.
7. Stop the engine.
8. Shut off the water and disconnect the garden hose from the machine.
9. Start the engine and run it for a few minutes to dry the housing to prevent it from rusting.
10. Allow the engine to cool before storing the machine in an enclosed area.

# Storage

Store the machine in a cool, clean, dry place.

## Preparing the Machine for Storage

### **⚠ WARNING**

Gasoline vapors can explode.

- Do not store gasoline more than 30 days.
  - Do not store the machine in an enclosure near an open flame.
  - Allow the engine to cool before storing it.
1. On the last refueling of the year, add fuel stabilizer to the fuel as directed by the engine manufacturer.
  2. Dispose of any unused fuel properly. Recycle it according to local codes, or use it in your automobile.  
**Note:** Old fuel in the fuel tank is the leading cause of hard starting. Do not store fuel without stabilizer more than 30 days, and do not store stabilized fuel more than 90 days.
  3. Run the machine until the engine stops from running out of fuel.
  4. Start the engine again.
  5. Allow the engine to run until it stops. When you can no longer start the engine, it is sufficiently dry.
  6. Disconnect the wire from the spark plug.
  7. Remove the spark plug, add 30 ml (1 oz) of oil through the spark plug hole, and pull the starter rope slowly several times to distribute oil throughout the cylinder to prevent cylinder corrosion during the off-season.
  8. Loosely install the spark plug.
  9. Tighten all nuts, bolts, and screws.

## Folding the Handle

### **⚠ WARNING**

Folding or unfolding the handle improperly can damage the cables, causing an unsafe operating condition.

- Do not damage the cables when folding or unfolding the handle.
  - If a cable is damaged, contact an Authorized Service Dealer.
1. Loosen the handle knobs until you can move the upper handle freely.

2. Fold the upper handle forward as shown in [Figure 24](#).

**Important:** Route the cables to the outside of the handle knobs as you fold the handle.

Figure 24

3. To unfold the handle, reverse the steps above.

## Removing the Machine from Storage

1. Remove the spark plug and spin the engine rapidly by pulling the recoil start handle to blow the excess oil from the cylinder.
2. Install the spark plug and tighten it with a torque wrench to 20 N-m (15 ft-lb).
3. Connect the wire to the spark plug.

**The Toro Total Coverage Guarantee**  
A 2-Year Full Warranty (45 Day Limited Warranty for Commercial Use)

22 in Recycler®  
20 in Mulcher/Bagger  
Walk Power Mowers

**The Toro GTS Starting Guarantee**  
A 3-Year Full Warranty (Not Applicable for Commercial Use)

**Conditions and Products Covered**

The Toro Company and its affiliate, Toro Warranty Company, pursuant to an agreement between them, jointly promise to repair the Toro Product listed below if used for residential purposes\*; if it is defective in materials or workmanship or if it stops functioning due to the failure of a component; or if the Toro GTS (Guaranteed to Start) engine will not start on the first or second pull, provided the routine maintenance required in the *Operator's Manual* have been performed.

This warranty covers the cost of parts and labor, but you must pay transportation costs.

The following time periods apply from the date of purchase:

Products	Warranty Period
22 in Recycler and 20 in Mulcher/Bagger and Attachments	2 - year full warranty
GTS (Guaranteed to Start) Engine	3 - year full warranty
Battery	1 - year full warranty

**Limited Warranty for Commercial Use\***

Gas-powered Toro Products used for commercial, institutional, or rental use, are warranted for 45 days against defects in materials or workmanship. Components failing due to normal wear are not covered by this warranty.

The Toro GTS (Guaranteed to Start) Starting Guarantee does not apply when the product is used commercially\*.

**Instructions for Obtaining Warranty Service**

If you think that your Toro Product contains a defect in materials or workmanship, or if a normal, able-bodied adult can no longer start your product's engine in one or two pulls, follow this procedure:

1. Contact any Authorized Toro Service Dealer to arrange service at their dealership. To locate a dealer convenient to you, refer to the *Yellow Pages* of your telephone directory (look under "Lawn Mowers") or access our web site at [www.Toro.com](http://www.Toro.com). You may also call the numbers listed in item #3 to use the 24-hour Toro Dealer locator system.
2. Bring the product and your proof of purchase (sales receipt) to the Service Dealer. The dealer will diagnose the problem and determine if it is covered under warranty.
3. If for any reason you are dissatisfied with the Service Dealer's analysis or with the assistance provided, contact us at:

Customer Care Department, RLC Division  
The Toro Company  
8111 Lyndale Avenue South  
Bloomington, MN 55420-1196  
Toll free at 866-214-9807 (U.S. customers)  
Toll free at 866-214-9808 (Canadian customers)

**Owner Responsibilities**

You must maintain your Toro Product by following the maintenance procedures described in the *Operator's Manual*. Such routine maintenance, whether performed by a dealer or by you, is at your expense.

**Countries Other than the United States or Canada**

Customers who have purchased Toro products exported from the United States or Canada should contact their Toro Distributor (Dealer) to obtain guarantee policies for your country, province, or state. If for any reason you are dissatisfied with your Distributor's service or have difficulty obtaining guarantee information, contact the Toro importer. If all other remedies fail, you may contact us at Toro Warranty Company.

**Australian Consumer Law:** Australian customers will find details relating to the Australian Consumer Law either inside the box or at your local Toro Dealer.

\*Residential purposes means use of the product on the same lot as your home. Use at more than one location, or institutional or rental use, is considered commercial use, and the commercial use warranty would apply.

**Items and Conditions Not Covered**

There is no other express warranty except for special emission system coverage and engine warranty coverage on some products. This express warranty does not cover the following:

- Cost of regular maintenance service or parts, such as filters, fuel, lubricants, oil changes, spark plugs, air filters blade sharpening or worn blades, cable/linkage adjustments, or brake and clutch adjustments
- Components failing due to normal wear
- Any product or part which has been altered or misused or neglected and requires replacement or repair due to accidents or lack of proper maintenance
- Pickup and delivery charges
- Repairs or attempted repairs by anyone other than an Authorized Toro Service Dealer
- Repairs necessary due to failure to follow recommended fuel procedure (consult *Operator's Manual* for more details)
  - Removing contaminants from the fuel system is not covered
  - Use of old fuel (more than one month old) or fuel which contains more than 10% ethanol or more than 15% MTBE
  - Failure to drain the fuel system prior to any period of non-use over one month
- Repairs or adjustments to correct starting difficulties due to the following:
  - Failure to follow proper maintenance procedures or recommended fuel procedure
  - Rotary mower blade striking an object
- Special operational conditions where starting may require more than two pulls:
  - First time starts after extended period of non-use over three months or seasonal storage
  - Cool temperature starts such as those found in early spring and late autumn
  - Improper starting procedures - if you are having difficulty starting your unit, please check the *Operator's Manual* to ensure that you are using the correct starting procedures. This can save an unnecessary visit to an Authorized Toro Service Dealer.

**General Conditions**

All repairs covered by these warranties must be performed by an Authorized Toro Service Dealer using Toro-approved replacement parts. Repair by an Authorized Toro Service Dealer is your sole remedy under this warranty.

**Neither The Toro Company nor Toro Warranty Company is liable for indirect, incidental, or consequential damages in connection with the use of the Toro Products covered by these warranties, including any cost or expense of providing substitute equipment or service during reasonable periods of malfunction or non-use pending completion of repairs under these warranties.**

Some states do not allow exclusions of incidental or consequential damages, so the above exclusions may not apply to you.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.
