	95-0042	Wiring Harness - Control Box

SEE BACK OF PAGE FOR WIRING DIAGRAM

The following instructions detail the substitution of the new wiring harness, Part No. 95-0042, for the old wiring harness, Part No. 01-606-0390.

44085, 44089

1. Part No. 95-0033 will connect to the single black terminal end of wiring harness, Part No. 95-0042, and the yellow accessory terminal on the Kohler engine. The fuse, Part No. 95-0041, should be placed in holder of Part No. 95-0033.
2. The grounding harness, Part No. 95-0036, should be replaced if showing signs of wear (i.e. abrasions, cuts, etc.).
3. The wiring connections in the control box are shown in the owner's manual.

44081, 44083

1. Substitute the wiring harness, Part No. 95-0042, for the wiring harness, Part No. 01-606-0390.
2. The grounding harness, Part No. 95-0036, should be replaced if showing signs of wear (i.e. abrasions, cuts, etc.).
3. The wiring connections in the control box are shown in the owner's manual.
