Subject: Radiator Upgrade Kit (100-6421) Available

As a product enhancement, a new radiator was developed for the Greensmaster 3250. The new radiator has wider fin spacing, a different profile, and requires a different cover, different hoses, and a new support. The new radiator is not a “drop in” replacement.

The new radiator may help small debris pass through the cooling fins and could benefit customers using this product on areas other than greens. Customers wishing to update their products to the newer style radiator may order and install Radiator Kit (100-6421). Installation instructions and required parts are all included.

This change represents an ongoing product improvement and does not represent a warrantable defect in materials or workmanship. Upgrades are made at customer’s option and expense.
