TransPro[®] 100 Trailer

Date: 12/20/01

<u>Model/Serial Range:</u>	<u>Model Number:</u>	<u>Serial Numbers:</u>
	04240	80001-210009999

Subject: Plastic Mat Fasteners break.

The original Plastic Fastener (99-4515) that holds the floor mat in place on the trailer may not endure the repeated impacts that occur when loading and unloading walk greens mowers.

All future orders for the original plastic fastener will automatically cross-reference to replacement Drive Rivet (105-5392). This part is made from metal and is a direct replacement that can be installed without modification. The durability of the metal rivet will provide a substantial improvement over the plastic part. Contact the local Toro distributor in your area for addition details on this subject.
