	07210	40001-49999

### Subject: Availability of Mud Flaps.

Front Mud Flap Kit (93-8957) is now available for all Workman 3000 & 4000 series vehicles through your local Toro distributor. The mud flaps will mount directly behind the front wheels and extend to the operator platform preventing debris buildup on the rear of the machine and the engine. This kit will retrofit to older machines by drilling the appropriate holes in the operator platform for the mud flap bracket. An illustration is shown below for your reference. Installation Instructions are included with the kit.
