Operating Tips

Carry loads as low as possible.

On slopes or when loading onto a trailer, keep the heavy end uphill. With no attachment, an empty bucket, or another light attachment the back is the heavy end; with a full bucket or a hydraulic attachment, the front is the heavy end.

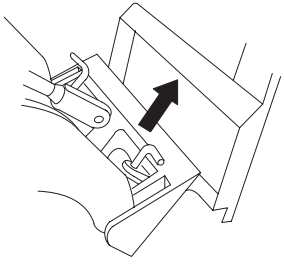

m-7040

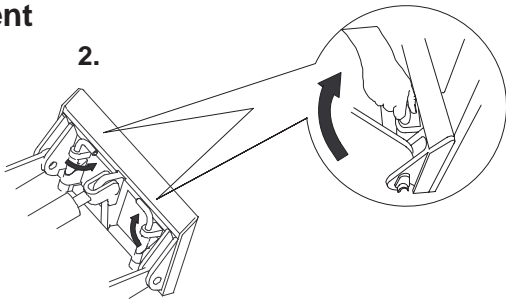

Connecting an Attachment

1.

2.

3. Ensure that the pins are engaged in the holes in the attachment mounting plate.

m-6571

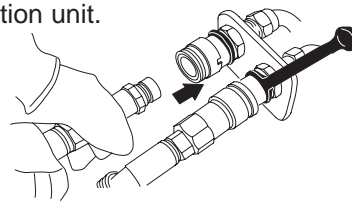

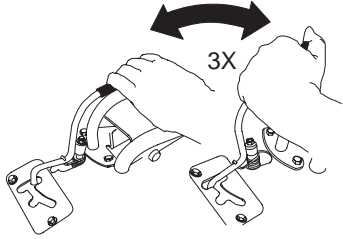

Connecting Hydraulics

1. Stop the engine.

2. Slowly cycle the hydraulics lever 3 times.

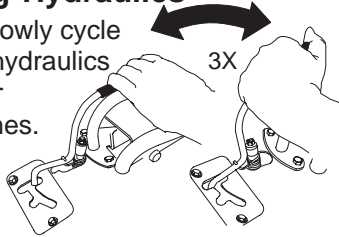

3. Release the hydraulics lever into Neutral.

4. Clean the couplers and then push the attachment hydraulic couplers into the couplers on the traction unit.

Disconnecting Hydraulics

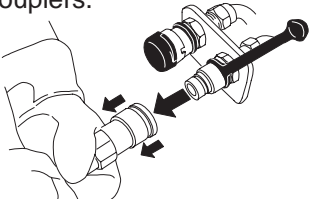

1. Stop the engine.
2. Slowly cycle the hydraulics lever 3 times.

3. Release the hydraulics lever into Neutral.

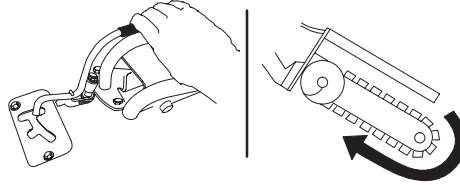

4. Pull back the collar on the female hydraulic couplers and pull the attachment couplers from the traction unit couplers. Place the caps over the traction unit couplers.
