 Model No. 41107—Serial No. 200000001 and Up

Operator's Manual Addendum

Important Place this addendum with your *Operator's Manual* for future reference.

After every 400 operating hours or yearly, clean and lubricate the clutch as follows:

1. If you have a Workman vehicle, raise and latch the cargo box.
2. Stop the engine, remove the key, and set the parking brake.
3. If you have a Multi-Pro turf sprayer, complete the following:
 - A. Raise the front end of the sprayer and support it on jack stands.

| 1. Clutch cover | 3. Heat shield |
| 2. Hose | |

Danger

A sprayer on a jack may be unstable and slip off of the jack, injuring anyone beneath it.

- Do not start the engine while the sprayer is on a jack.
- Always remove the key from the ignition before getting off of the sprayer.
- Block the tires when the sprayer is on a jack.

- B. Disconnect the hose located on the lower-front face of the tank (Fig. 1).

- Remove the 3 bolts securing the cover to the clutch and remove the cover (Fig. 2).

Note: On a sprayer, you may need to push the heat shield (Fig. 1) back as you remove the cover.

Figure 2

- Cover
- Bolts

- Thoroughly clean the inside of the cover and the inner workings of the clutch using compressed air.

	Caution	
<p>The dust in the clutch will become airborne and could damage your eyes or you could inhale it causing breathing difficulties.</p> <p>Wear safety goggles and a dust mask or other eye and respiratory protection when performing this procedure.</p>		

Recommended Maintenance Schedule

Add the following line to the Recommended Maintenance Schedule in your *Operator's Manual*:

Every 400 hours or yearly	<ul style="list-style-type: none"> Clean and lubricate the primary drive clutch
---------------------------	--

- Lubricate the moving parts in the areas circled in Figure 3 using Toro Dry Lubricant Spray, available through your Authorized Toro Dealer or Distributor.

Figure 3

- Install the clutch cover and secure it with the 3 bolts removed previously.
- On a sprayer, connect the hose on the front of the tank (Fig. 1).
